

THE KIRKFIELD, NEWTON-LE-WILLOWS

After an extensive refurbishment, The Kirkfield hotel in Newton-le-Willows has recently reopened its doors. This elegant, historic building is the new go-to place for an array of occasions.

The exterior of The Kirkfield is now illuminated with our Beam LED luminaires. After visiting our showroom, St. Helens based 3D Electrical Supplies worked closely with the Kirkfield hotel and Ansell to select the correct luminaire for the application. The Beam LED luminaire is a compact powerful die-cast aluminium wall light with a dual purpose design that allows installation as either a canopy downlight or as an upright.

As you can see from our location photography, The Kirkfield is now distinctly illuminated well in to the evening by the Beam LED. If you would like to find out more about this luminaire, [click here](#).
