

BEAR COFFEE NORTHWICH

Bear isn't a traditional coffee shop. BEAR is a coffee, kitchen and bar, providing an all-day experience with an ethos of perfection. They serve speciality coffee, seasonal fresh food, cocktails and craft beer in beautifully thought out spaces. Founded in 2014, BEAR currently operate four sites across the Midlands and one in Central London.

The location in focus for this case study is Bear Northwich. Taking prime spot in the new Barons Quay development, BEAR Northwich is situated in a bright, South-East facing corner unit overlooking the beautiful River Weaver.

Bear have created a culture of excellence with every inch of their spaces carefully thought out ensuring a great customer experience. When it came to their lighting requirements it was essential that the luminaires installed at the site were high-quality, reliable and provided value for money.

Ansell's [Prism Pro LED Fire Rated Downlight](#) was the obvious choice when it came to selecting a downlight to be installed in the kitchen area. The Prism Pro is a 220-240V IP65 LED dimmable fire rated downlight that comes with a remote driver with 2x1.5mm² and CPC push-fit loop-in, loop-out terminals provide an easy and efficient installation.

The Prism Pro is packed with features such as a wide 60° beam angle for increased light distribution which was integral for its use case in the kitchen. Three different bezel options allow the downlight to be adaptable to any environment. For peace of mind, Prism Pro is fully tested for 30, 60 and 90 minute ceiling types to meet Part B of building regulations and fully tested to meet Part C (moisture) and Part E (acoustic) of building regulations.

The Prism Pro's minimalist design accompanied with it's high-quality features make it the ultimate downlight. Providing value for money, quality, reliability and easy installation. It's the ultimate LED solution.

Ansell's [Endurance LED Recessed Panel](#) which is a high performance and maintenance free panel were installed throughout the hallways. It features a white anodised aluminium frame for visual compatibility with the ceiling grid and has TPa as standard. Low glare and even light distribution make the Endurance Panel the perfect solution for multiple applications. The high-quality panel has a LED lifespan of L90 52,000 hours making it the go-to reliable solution for all lighting requirements.

The team at Bear Coffee were incredibly pleased with the results. Our energy saving LED solutions will allow Bear to save on energy costs whilst also having long lasting reliable luminaires.
