

KOMMUNE, SHEFFIELD

Bringing together independent kitchens, artisanal bakeries, speciality coffee makers, craft brewers and design led retailers in one eclectic urban space, [Kommune](#) is a great new concept, situated right at the heart of Sheffield's old city centre.

When renovating the 16,000 square foot space, Salford based SLD Lighting provided a great combination of Ansell Lighting luminaires.

Our [Three Circuit Unity 0 LED trackspot](#) is a compact LED trackspot with an integral driver and three circuit functionality, allowing for installations with multi-current requirements. With an LED lifespan of L70 50,000 hours and anti-glare design for visual comfort, the Unity perfectly illuminates the entirety of [Kommune's](#) dining area.

In addition to the Unity 0 LED Trackspot, the [Furia AC LED](#) has also been installed in the dining areas at [Kommune](#). This shallow AC LED die-cast surface downlight has a modern aesthetic appearance and is triac dimmable as standard.

Kommune also houses events on a regular basis. In addition to the dining areas, there are also large open spaces that are illuminated with our 1200x300 [Endurance panels](#). Suspended from the ceiling, this high performance maintenance free LED panel is available in either cool white or warm white options. The product's low glare and even light distribution ensures its suitability for a wide variety of applications.

Unit 6B, Stoncross Industrial Park, Yew Tree Way, Warrington, WA3 3JD
