

## ZINC, BALLYMONEY

Zinc, Ballymoney, opened their doors in early 2018.

Whilst redesigning the building to suit the requirements of a working restaurant, the electrical contractors required quality, reliable LED strip lighting to illuminate particular features and areas of the restaurant.

To complete this project, the electrical contractors used a variety of Ansell Lighting's LED strip lighting range. The LED strip lighting was applied behind wall features to add to their striking aesthetic and installed on to some ceiling spaces to illuminate walkways and highlight existing colour schemes.

Our LED strip range is perfectly applied to restaurants and other similar hospitality applications. Our Adder, Cobra and Concho ranges are available in a range of colours, including warm white, cool white and RGB.

If you are looking for further information regarding our LED strip product range, and how it can be integrated in to any of your future lighting projects please do not hesitate to contact us.
